Example, “care needs in people with dementia”

Learning objectives

- To understand care needs in people with dementia and determinants associated with care needs
- To understand methods of needs assessment
- To understand causes and consequences of unmet needs
- To understand the importance of timely access to formal care and facilitators to enhance access

Module 1	Module 2	Module 3
7 topics	6 topics	4 topics
<p>Theoretical issues of psychosocial care and quality of life of people with dementia</p> <p>Care needs in people with dementia</p> <p>Psychosocial interventions in dementia</p> <p>Ethical and legal considerations in dementia</p> <p>Prevention of dementia and healthy ageing</p> <p>Practical aspects of psychosocial interventions</p> <p>Psychosocial Approaches Technological based</p>	<p>Theoretical perspectives on caregiving</p> <p>Policies and care systems for informal caregivers</p> <p>Assessment of informal caregivers</p> <p>Caregiver impact and diversity</p> <p>Caregiver interventions, traditional and eHealth</p> <p>Implementation of caregiver (eHealth) interventions</p>	<p>Organization of formal care</p> <p>Theoretical models on stress, burnout and compassion fatigue</p> <p>Interventions (to support professional caregivers in their working activities)</p> <p>Person centered care and communication</p>

Module 2

Sidecar curriculum		
Module 1	Module 2	Module 3
7 topics	6 topics	4 topics
<p>Theoretical issues of psychosocial care and quality of life of people with dementia</p> <p>Care needs in people with dementia</p> <p>Psychosocial interventions in dementia</p> <p>Ethical and legal considerations in dementia</p> <p>Prevention of dementia and healthy ageing</p> <p>Practical aspects of psychosocial interventions</p> <p>Psychosocial Approaches Technological based</p>	<p>Theoretical perspectives on caregiving</p> <p>Policies and care systems for informal caregivers</p> <p>Assessment of informal caregivers</p> <p>Caregiver impact and diversity</p> <p>Caregiver interventions, traditional and eHealth</p> <p>Implementation of caregiver (eHealth) interventions</p>	<p>Organization of formal care</p> <p>Theoretical models on stress, burnout and compassion fatigue</p> <p>Interventions (to support professional caregivers in their working activities)</p> <p>Person centered care and communication</p>

Example, “Assessment of informal caregivers”

Learning objectives

- To introduce the rationale behind informal caregiver assessment
- To describe guidelines on informal caregiver assessment for practice across settings (home, hospital, community-based programs)
- To discuss advantages of a multidimensional approach, such as Pearlin’s stress model (1990)
- To mention basic requirements of informal caregiver assessment measures followed by a description of the Zarit Burden Interview (Zarit et al., 1985)

Module 3

Sidecar curriculum		
Module 1	Module 2	Module 3
7 topics	6 topics	4 topics
Theoretical issues of psychosocial care and quality of life of people with dementia	Theoretical perspectives on caregiving	Organization of formal care
Care needs in people with dementia	Policies and care systems for informal caregivers	Theoretical models on stress, burnout and compassion fatigue
Psychosocial interventions in dementia	Assessment of informal caregivers	Interventions (to support professional caregivers in their working activities)
Ethical and legal considerations in dementia	Caregiver impact and diversity	Person centered care and communication
Prevention of dementia and healthy ageing	Caregiver interventions, traditional and eHealth	
Practical aspects of psychosocial interventions	Implementation of caregiver (eHealth) interventions	
Psychosocial Approaches Technological based		

Module 3

Sidecar curriculum		
Module 1	Module 2	Module 3
7 topics	6 topics	4 topics
<p>Theoretical issues of psychosocial care and quality of life of people with dementia</p> <p>Care needs in people with dementia</p> <p>Psychosocial interventions in dementia</p> <p>Ethical and legal considerations in dementia</p> <p>Prevention of dementia and healthy ageing</p> <p>Practical aspects of psychosocial interventions</p> <p>Psychosocial Approaches Technological based</p>	<p>Theoretical perspectives on caregiving</p> <p>Policies and care systems for informal caregivers</p> <p>Assessment of informal caregivers</p> <p>Caregiver impact and diversity</p> <p>Caregiver interventions, traditional and eHealth</p> <p>Implementation of caregiver (eHealth) interventions</p>	<p>Organization of formal care</p> <p>Theoretical models on stress, burnout and compassion fatigue</p> <p>Interventions (to support professional caregivers in their working activities)</p> <p>Person centered care and communication</p>

Example “Person centered care and communication”

Learning objectives

- To know the principles of person-centered care.
- To learn the specific features of communication with people with dementia.
- To get the basic skills for improving the communication with healthcare professionals and informal carers.
- To learn the principles to cope the main behavioral and psychological symptoms in dementia.
- To be aware about the cultural features in the care of people with dementia.

European
Commission

Studying the material

SIDECAR

Some benefits

- It's **free** (registration required)
- You **learn about different aspects** in dementia care from international experts
- You can **study whenever and wherever** you want
- Easily understandable and **user-friendly online platform** where the material is stored.
